

# ALEXANDRE CARDIN

FULL-STACK DEVELOPER

## PROFILE

Passionate about technological innovation and application development, I specialized in the design, development, and maintenance of web and mobile applications.

My expertise covers Java and C#, as well as the entire project lifecycle.

From development to release, including optimization and continuous maintenance, I ensure robust and scalable solutions.

## EXPERIENCES

### .NET/React Software Engineer – Viveris

Since 07/2024

As a software engineer within a team dedicated to Liebherr (a global leader in construction machinery and industrial systems), I contributed to the industrialization and functional evolution of a Fleet Management System (FMS). This system enables the supervision, optimization, and automation of logistics flows in an industrial environment.

### .NET/Angular Developer – Illinks

July 2022 – July 2024

As a developer at Illinks, I enhanced a SaaS document management system (DMS) for accountants by developing web services (.NET), including REST APIs for business workflows (tax filings, validations) and user interfaces, within an Azure/SSMS environment and following Agile methodology.

### React Developer – Maestria

October 2020 – September 2021

Developed user interfaces for an AI/ML powered cybersecurity platform designed to analyze, detect, and respond to threats in real time.

### React Developer – Voodoo

June 2020 – June 2020

Designed and developed a moderation platform for internal teams, enabling the supervision, filtering, and management of mobile app content.

### Java Developer – Les Toulousaines Audacieuses

December 2019 – February 2020

Worked in a team to develop a member area for a Toulouse-based association, enabling women entrepreneurs to interact through articles and events. Back-end built with Java/Spring Boot (MySQL, Tomcat) and Thymeleaf for rendering. Followed Scrum methodology and used GitHub for version control.

## EDUCATION

### Institut Poly Informatique

October 2020 – September 2021

Bachelor's Degree (Work-Study) in Web & Mobile Application Development

### Wild Code School

September 2019 – February 2020

Web and Mobile Web Application Design. Acquired skills in web and software development. Participated in group projects.

### 42 School Intensive Bootcamp

February 2019

Intensive 4-week coding bootcamp at École 42, focused on C programming, algorithm implementation, memory management, and Unix tools (Shell, Git). Developed problem-solving, autonomy, and collaboration skills through individual and team projects in a high-pressure, peer-driven environment.

## SKILLS

### Technical Skills

- C#/.NET
- JAVA/Spring Boot
- React
- Angular
- SQL
- APIs REST
- DDS
- gRPC
- SignalR
- Redis
- RTI connext
- SSMS
- Scrum
- Git

### Additional Information

- Honest, reliable, and punctual
- English: Cambridge B2 level
- Interpretation of technical drawings
- Driving license: Car and Motorcycle
- Basketball
- Tennis
